OUTDOOR DOCK AND LANDSCAPE LIGHTING

*12V LED lighting to
enhance any dock or landscape need*

ProSprink Maintenance

a subsidiary of

offers a full line of landscape and dock lighting systems.

Dock Lighting

Each spring we install your specific light kit after your dock and canopy are put in for the season at the rate of time plus material costs. Each fall we will remove everything and place your light kit in a container and leave it with you...it's yours!

Our lighting systems consist of 12V LED bulbs that last approximately 40,000 hours or 15 years. Each bulb uses approximately 2 watts of power and each kit typically uses less electricity than one 60 watt light bulb.

We offer several different options to control your unique dock lighting system:

Photo Eye - typical dusk to dawn operation. Your lights will be illuminated all night long.

Switch - We install a typical light switch at the entrance of your dock. Turn on your lights when you enter and turn off when you leave.

Remote Control - a small hand held wireless remote control unit that turns your lighting system on and off on demand.

Phone App - control your dock lighting system from the convenience of your smart phone. iPhone and Android compatible.
